

WALK AND FUNDRAISE TO CURE DIABETES

Diabetes Facts and Figures

Why Support JDRF:

Your support is helping children and adults worldwide by accelerating life-changing type 1 diabetes (T1D) breakthroughs. The following are some key facts you can share with potential donors when you approach them to support you in your fundraising efforts:

Key Facts and Figures:

- JDRF's goal is to improve the lives of all people affected by T1D by accelerating progress on the most promising opportunities for curing, better treating, and preventing the disease.
- More than 300,000 Canadian children and adults live with T1D.¹
- The number of people living with T1D is increasing by 5% annually – and the greatest rise is in children under five years of age.²
- Over three million Canadians have some form of diabetes (9% of the Canadian population).³
- According to the International Diabetes Federation, 415 million people worldwide are currently living with diabetes (both T1D and type 2 diabetes). This number is projected to rise to 642 million people by 2040.⁴
- Since its founding 47 years ago, JDRF has funded \$2 billion (US) in T1D research.⁵
- Currently, JDRF is funding more than 50 human clinical trials,⁶ several of which are in the advanced stages of clinical testing.
- The World Health Organization indicates up to 15% of a nation's health budget is spent on diabetes.⁷
- By 2020, it is estimated that diabetes will cost the Canadian healthcare system \$16.9 billion a year.⁸
- The rate of T1D incidence among children under the age of 14 is estimated to increase by 3% annually worldwide.⁹
- According to the International Diabetes Federation, 77,800 children under the age of 15 develop T1D annually and this incidence is increasing rapidly.¹⁰
- Living with T1D requires approximately 1,095 to 1,460 needles a year (based on three to four injections per day)¹¹ and 1,460 to 2,920 finger pokes a year (four to eight per day) to test blood sugar levels.¹²
