

Stream your fundraising

Live Fundraising is a great way to tell your story, engage with donors, and create a richer connection to the mission!

Great, how do I get started?

1. You'll need a device to stream with (we suggest your smartphone but you can also use desktop/laptop)
2. Download a streaming app to your phone ([Twitch](#)) or software to your desktop (like [Streamlabs](#))
3. Set up an account with a streaming service (Twitch, if you don't already have one)
4. Add your streaming username to your fundraising page & save – you're ready to go!
 - Click **Your Page** in the top bar
 - Click the **Settings** tab on your page
 - Choose your service and enter your username
 - Click **Save Changes**
 - In the App, click the profile Icon, there will be a go Live Button
 - Allow permissions for Camera/Audio and you will be able to set a stream title and go live
5. Adding donate button to your Twitch page:
 - On your Twitch page, scroll down below the video player and click the "Edit Panels" slider
 - Click the large + (Plus sign in empty box)
 - Click "Add a Text or Image Panel"
 - Click the "Add Image" button and choose the image you wish to display. We have provided an image for you in our resource centre, which [you can download here.](#)

- In the "Image Links To:" box, paste the link to your personal fundraising page
 - You can leave the remaining boxes empty unless you wish to populate them.
 - Click "Submit"
 - Click the "Edit Panels" slider
5. Share the link to your fundraising page on social media channels, text messages, and email to let people know when to tune in

Please Note for Desktop:

- Click on the bottom left Gear Icon "Settings", navigate to Audio and make sure the mic you are using is selected as the Mic Device.
- Click the "+" Icon next to "Sources", select Video Capture Device, then select your webcam/video input
- On the webcam source input, Right click > Transform> fit to screen.
- The above is a basic setup for a webcam + mic, anything additional will require more setup. Default streaming output settings is 720p30fps.

What's Next?

Once your streaming account is setup, add your streaming username to your fundraising page by clicking **Your Page**, then clicking the pencil icon to edit

When you start streaming from your connected streaming software, your stream will appear on your fundraising page.

Happy streaming!
